Hi Annah,

Yes, thank you for the information on Chambers county, I especially appreciate the map! I was wondering if you have the shape file for use to overlay on Google Earth. Would you be willing to share that?

John

I demob today actually. Looks like I just missed you. Chabers EOM, Roy Turner I believe, is very friendly and approachable however he is difficult to nail down on the telephone. We always had better luck finding him in his office in person. He has been waiting on a follow up for the request he made for 6-8 moisture sensors for the county personnel to use. We provided him with outreach materials in digital format, however they have yet to appear on the county Facebook page/ social media. If we hear anything about the sensors he would be glad for it but in the meantime that EOC is likely gearing down. That county flood map is up on the SharePoint page if your interested, it's just one I created for use on this outreach. I am attaching as well. We went to Winnie and Anahuac in person but have not reached out to any faith or community based organizations so that would be a great place to start. Hope this helps some?

Annah-

I see that you were the CL for Chambers and John Reyna and I are assigned to Chambers. If you have any tips, please let us know! When do you head out?
